## Clients Recommendation

**Pre-Qualification Department** 

Re: Special Support Company

Dear Sir,

It is with my pleasure that I am writing to recommend the electrical services of Special Support Company.

We have been working with Special Support for the past two years, and have always been completely satisfied with their performance and quality. We have completed the KAEC 2 substation connectivity with the company. Special Support has installed over 150 km of MV cable to connect the industrial valley 1 & 2 with over 300 MV joints. The work was completed recently and had no failure during this summer season which is indicative of their quality work.

We are currently working with the Special Support on Waha neighborhood and NCB data center connectivity to KAEC 2 substation with over 35 km of cable installed. Currently, they are three months ahead of schedule to finish the project.

Special support continues to be awarded electrical work at the city. As of today, they have two additional major projects that they are considered for.

I am happy to recommend the services of Special Support. If you have any, please feel free to contact me directly.

Sincerely,

Walid oberilall
